

March 17, 2004

Mr. Robert Therkelsen
Executive Director
California Energy Commission
1516 Ninth Street
Sacramento, CA 95814-5512

Dear Mr. Therkelsen:

In accordance with the provisions of Title 20, California Code of Regulations, the City and County of San Francisco hereby submit this Application for Certification (AFC) seeking authority to construct and operate the San Francisco Electric Reliability Project (SFERP), a 145-megawatt, natural gas-fired, peaking power plant to be located in the City of San Francisco.

The project will employ advanced, high-efficiency combustion turbine technology and selective catalytic reduction to minimize facility emissions. The project will use recycled water from an onsite treatment plant.

Construction and operation of this plant will also allow for a net reduction in air emissions and the closure of Hunters Point Power Plant, important goals of the City of San Francisco.

As an official of the City and County of San Francisco, I hereby attest, under penalty of perjury, that the contents of this application are truthful and accurate to the best of my knowledge.

Sincerely,

A handwritten signature in black ink, appearing to read "Jesse Blout", with a long horizontal line extending to the right.

Jesse Blout
Economic Development Director
